DETAILED ACTION

Allowable Subject Matter

1. Claims 4-7, 9, 10, 12, 14-17, and 22 are allowed.

The following is an examiner's statement of reasons for allowance:

- Regarding claim 5, the prior art fails to teach or fairly suggests a method requiring the step of estimating a constant of proportionality relating x-ray current of an x-ray radiation source and attenuation of radiation raised to the selected power, the constant of proportionality being estimated based on an initial transmission tomographic imaging data acquired in an initial revolution and, prior to acquiring tomographic imaging data at an upcoming position or angular bin, adjusting the x-ray current proportional to the estimated attenuation of radiation for the upcoming position or angular bin raised to the selected power using the estimated constant of proportionality, in combination with all the other limitations of the claim.
- Regarding claim 14, the prior art fails to teach or fairly suggests a method requiring the step of determining a baseline current component based on a ratio of an estimated baseline attenuation of an upcoming position or angular bin and an average attenuation of the initial revolution, determining an axial current component based on a ratio of an estimated axial attenuation of the upcoming position or angular bin and a maximum or average attenuation of a present revolution, and determining a total x-ray current by combining the baseline and axial x-ray current components, in combination with all the other limitations of the claim.
- Claims 4, 6, 7, 9, 10, 12, 15, 16, and 22 are allowable by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
